Conference theme

Signal and information processing for aligning human-machine generalization

Introduction

APSIPA ASC is the annual conference organized by Asia-Pacific Signal and Information Processing Association (APSIPA). Founded in 2009, APSIPA aims to promote research and education in signal processing, information technology, and communications.

APSIPA ASC in Hanoi, Vietnam will be the 18th edition, and we are calling for submissions in all aspects of applications. Please refer to the conference web page (<https://apsipa2026.org>) for full information. All accepted papers will be included in IEEE Xplore. The technical program includes, but not limited to the following areas:

Topics

- Signal Processing Systems: Design and Implementation
- Signal and Information Processing Theory and Methods
- Speech, Language, and Audio
- Biomedical Signal Processing and Systems
- Image, Video, and Multimedia
- Multimedia Security and Forensics
- Wireless Communications and Networking
- Deep Learning: Algorithms, Implementations, and Applications
- Signal and Information Processing in Education
- Medical Signal Acquisition, Analysis and Processing
- Internet of Things Technology
- Data Analytics and Machine Learning
- Human Biometrics and Security Systems
- Signal and Information Processing for Smart Systems
- Multimodal AI
- Generative AI and Large Language Models
- Neuroscience and Artificial Intelligence for Education
